# CBIZ Human Capital Management Time & Attendance

Organizations weighed down by hard-to-use time and attendance systems are wasting and risking their most important resources as they struggle to efficiently manage their employees' time, resources and schedules.

CBIZ Time Solutions' employee-friendly mobile apps and manager-friendly reporting tools make time and attendance easy for your entire organization so you can focus on driving growth, not tracking time.

Whether you're tracking employee hours to maintain compliance, enabling employees to adjust their schedules or forecasting time to maintain budgets, our time and attendance tools turn a requirement into a strategic resource.

Additionally, CBIZ Time Solutions can be integrated with our HRIS technology and benefits consulting, which are delivered locally and backed by national expertise.
