**[CITY, STATE]
[INSERT DATE]**

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 1 - NATURE OF PARTNERSHIP

ORGANIZATION

[Elaborate on strategy of Partnership in the organization footnote (for example, use language from PPM).]

XYZ Fund, LP (the “Partnership”) was formed as a limited partnership, pursuant to the Delaware Revised Uniform Limited Partnership Act on [insert date] and commenced operations on [insert date]. The Partnership’s principal place of business is [insert city, state]. The Partnership was formed for the purpose of purchasing, holding, selling and investing, on margin or otherwise, securities and financial instruments of United States and foreign entities, and engaging in activities and transactions as [insert name of GP, a Delaware partnership] (the “General Partner”) deems advisable. The Partnership shall continue indefinitely, provided however, the Partnership shall be dissolved upon the occurrence of any events set forth in the Limited Partnership Agreement (the “Agreement”).

The Partnership is not registered as an investment company and is not subject to the investment restrictions limitations on transactions with affiliates and other provisions of the Investment Company Act of 1940, as amended (the “Company Act”), in reliance upon an exemption from such registration provided in Section 3(c)(7) of the Company Act.

GENERAL PARTNER

The General Partner has control and authority with respect to the management of the Partnership’s business. The limited partners are not involved in the control, management or operation of the Partnership.

[insert name of Investment Manager] (the “Investment Manager”), a Delaware partnership, serves as the investment manager of the Partnership pursuant to an investment management agreement (the “Investment Management Agreement”). The Investment Manager, in consultation with the General Partner, is responsible for implementing the investment program of the Partnership, the day-to-day management of the Partnership, and the performance of administrative and oversight functions with respect to the Partnership. The Investment Manager [is/is not] registered as an investment adviser under the Advisers Act of 1940, as amended (the “Advisers Act”).

CONCENTRATION OF MEMBERS EQUITY/CAPITAL

As of December 31, 20XX, two members represented approximately XX% (XX% and XX%, respectively) of the members’ equity/capital of the Company.

OR

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 1 - NATURE OF PARTNERSHIP (CONTINUED)

CONCENTRATION OF PARTNERS' CAPITAL

As of December 31, 20XX, two Limited Partners represented approximately XX% (XX% and XX%, respectively) of partners' capital.

OR

CONCENTRATION OF PARTNERS' CAPITAL

As of December 31, 20XX, XX% of the total partners' capital belongs to one limited partner, who is an affiliate of the General Partner.

NOTE 2 – BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

The Partnership qualifies as an investment company, as defined in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 946 Financial Services – Investment Companies and, therefore, is applying the specialized accounting and reporting guidance in ASC Topic 946.

SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Partnership in the preparation of its financial statements. The policies are in conformity with United States generally accepted accounting principles ("U.S. GAAP"), which require management to make estimates and assumptions that affect the reported amounts, contingent assets and liabilities, and disclosures in the financial statements. Actual results could differ from those estimates. Management has considered the circumstances under which the Partnership should recognize or make disclosures regarding events or transactions occurring subsequent to the statement of financial condition date through [insert date] which represents the date the financial statements were available to be issued. Adjustments or additional disclosures, if any, have been included in these financial statements.

NEW ACCOUNTING PRONOUNCEMENT

See separate template for New Accounting Pronouncement Disclosure

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 2 – BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

PORTFOLIO VALUATION

All investments are recorded at their estimated fair value, as described in Note 3.

(CONDENSED) SCHEDULE OF INVESTMENTS

The industry classifications included in the (condensed) schedule of investments represent management's belief as to the most meaningful presentation of the classification of the Partnership's investments.

CASH, CASH EQUIVALENTS AND RESTRICTED CASH [IF NOT INCLUDED IN DUE FROM BROKER]

Cash, including cash denominated in foreign currencies, represents cash on hand and demand deposits held at financial institutions. Cash equivalents includes short-term, highly liquid investments of sufficient credit quality that are readily convertible to known amounts of cash and have original maturities of three months or less. Cash equivalents are carried at cost, plus accrued interest, which approximates fair value. Cash equivalents are held to meet short-term liquidity requirements, rather than for investment purposes. Cash and cash equivalents are held at major financial institutions and are subject to credit risk to the extent those balances exceed applicable Federal Deposit Insurance Corporation (FDIC) or Securities Investor Protection (SIPC) limitations.

Restricted cash is subject to a legal or contractual restriction by third parties as well as a restriction as to withdrawal or use, including restrictions that require the funds to be used for a specified purpose and restrictions that limit the purpose for which the funds can be used.

[If applicable: The Partnership considers cash pledged as collateral for securities sold short and cash collateral posted with counterparties for derivative contracts to be restricted cash OR The Partnership considers *(The Partnership should include a description of what balance sheet items are restricted)* to be restricted cash.]

[Disclose the nature of restriction on cash, cash equivalents, and amounts described as restricted cash]

[If cash held at foreign bank, include the following here or in Due From Broker if cash equivalents are held at broker:]

The Partnership maintains cash in U.S. Dollars and/or foreign currency of \$[amount] at bank(s) [located in (list countries)]. *[On the Statement of Financial Condition, foreign currency should be shown separate from cash and cash equivalents and historical cost noted on the face of the financials (or in the footnotes if not significant.)]*

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 2 – BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

DUE FROM/TO BROKER

[Include this paragraph instead of paragraph above if cash equivalents are included in due from broker]

Due from broker consists primarily of cash and cash equivalents (which include foreign cash balances), cash collateral with the Partnership's clearing broker and counterparties, and the amounts receivable or payable for securities that have not yet settled at December 31, 20XX. Cash at broker, which is related to securities sold, not yet purchased, and deposits on transactions are restricted until these securities are purchased or until the transactions are settled or terminated. Cash balances held at the broker, as well as securities owned by the Partnership serve as collateral for margin account debit balances existing at the broker.

INVESTMENT TRANSACTIONS, INCOME AND EXPENSE

[ADD OTHER INCOME/EXPENSES AS APPLICABLE]

All investment transactions are recorded on a trade-date basis. Realized gains or losses on dispositions of investments represent the difference between the original cost of the investment, based on the [specific identification method or average cost method], and the proceeds received from the sale. The Partnership applies a fair value accounting policy to its investments with changes in unrealized gains and losses recognized in the statement of operations as a component of net unrealized gain (loss). Interest income and expense are recorded on an accrual basis. Discounts and premiums on investments purchased are accreted and amortized to interest income over the lives of the respective investments. Discounts for high-yield debt securities and other debt securities are not amortized to the extent that interest income is not expected to be realized. **[If applicable:]** Premiums to the face amount of callable debt securities that have noncontingent call features that are callable at fixed prices and on preset dates are amortized using the effective interest rate method to the next call date when a call option at a specified price becomes exercisable. If there is no remaining premium or if there are no further call dates, the Partnership resets the effective yield using the payment terms of the debt security. Dividend income and expense are recorded on the ex-dividend dates, except certain dividends from foreign investments where the ex-dividend date may have passed. These dividends are recorded as soon as the Partnership is informed of the ex-dividend date. Dividend income on foreign investments is recorded net of any applicable withholding tax. Distributions that represent returns of capital in excess of cumulative profits and losses are credited to investment cost rather than investment income.

FOREIGN WITHHOLDING TAXES

Foreign withholding taxes represent taxes withheld on dividends earned on foreign and United States investments. Withholding taxes have been provided for in accordance with the applicable country's tax rules and rates.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 2 – BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

FOREIGN CURRENCY

All assets and liabilities denominated in foreign currencies are translated into U.S. Dollar amounts at the date of valuation. Purchases and sales of investments and income items denominated in foreign currencies are translated into U.S. Dollar amounts on the respective dates of such transactions. The Partnership does not separately account for that portion of the results of operations resulting from changes in foreign exchange rates on investments and the fluctuations arising from changes in market prices of investments held. Such fluctuations are included with the net realized and unrealized gains or losses on investments in the statement of operations. Adjustments arising from foreign currency transactions are reflected in the statement of operations.

INCOME TAXES [SEE ASC 740 INCOME TAX TEMPLATE]

EXPENSES PAID INDIRECTLY AND OTHER INCOME

The General Partner is authorized to determine the broker to be used for each investment transaction for the Partnership. In placing orders, transactions for the Partnership are allocated to brokers based upon several factors including best execution, research, ability to effect the transactions, reliability and financial responsibility. The Partnership may receive a variety of research, statistical information and other benefits through “soft dollar” arrangements entered into with brokers that may be used for the benefit of the Partnership or other entities under the General Partner’s control. For the year ended December 31, 20XX, the General Partner received benefits from soft dollar arrangements, of \$[insert amount] which were used for professional and administrative fees of the Partnership or other entities under the General Partner’s control. Such amounts have been included in the accompanying statement of operations. In addition, approximately \$[insert amount] of soft dollar rebates have been credited back to the Partnership for the year ended December 31, 20XX and are included in other income on the accompanying statement of operations.

[or, if soft dollar credits were received only for market research, include disclosure below instead]

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 2 – BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

NON-MONETARY TRANSACTIONS

The General Partner is authorized to determine the broker to be used for each investment transaction for the Partnership. In placing orders, transactions for the Partnership are allocated to brokers based upon several factors including best execution, research, ability to effect the transactions, reliability and financial responsibility. The Partnership may receive a variety of research, statistical information and other benefits through “soft dollar” arrangements entered into with brokers. Such benefits will be used to pay for administrative costs or expenses borne by the Partnership or other entities under the General Partner’s control. For the year ended December 31, 20XX, the General Partner received benefits from “soft dollar” arrangements that were used to pay for market research expenses. None of these amounts have been included in the financial statements with respect to such arrangements.

CAPITAL WITHDRAWALS PAYABLE

The Partnership recognizes withdrawals as liabilities, net of incentive allocations, when the amount requested in the withdrawal represents a fixed, determinable obligation. This may generally occur either at the time of the receipt of the notice, or on the last day of a fiscal period, depending on the nature of the request. Withdrawals paid after the end of the year, but based upon year-end capital balances, are reflected as withdrawals payable at December 31. Withdrawal notices received for which the dollar amount is not fixed results in capital not being recognized as a liability until the dollar amount is determined. (IF APPLICABLE: Capital withdrawals payable may be treated as capital for purposes of allocations of gains/losses pursuant to the Partnership's Limited Partnership Agreement.)

OFFSETTING OF AMOUNTS RELATED TO CERTAIN CONTRACTS

[SEE ASU OFFSETTING TEMPLATE FOR ADDITIONAL DISCLOSURE]

[Choose this or the following paragraph depending on the election of the Partnership.]

The Partnership has elected to offset fair value amounts recognized for cash collateral receivables and payables against fair value amounts recognized for derivative positions executed with the same counterparty under the same master netting arrangement. At December 31, 20XX, the Partnership offset cash collateral receivables and payables of \$X,XXX,XXX and \$X,XXX,XXX respectively, against its derivative positions. At December 31, 20XX, the Partnership had cash collateral receivables and payables of \$XX,XXX and \$XX,XXX, respectively, with derivative counterparties under the same master netting arrangement that were not eligible to be offset against its derivative positions.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 2 – BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

OFFSETTING OF AMOUNTS RELATED TO CERTAIN CONTRACTS (CONTINUED)

[Choose this or the preceding paragraph depending on the election of the Partnership.]

The Partnership has elected not to offset fair value amounts recognized for cash collateral receivables and payables against fair value amounts recognized for derivative positions executed with the same counterparty under the same master netting arrangement. At December 31, 20XX, the Partnership had cash collateral receivables and payables of \$XX,XXX and \$XX,XXX, respectively, with derivative counterparties under the same master netting arrangement.

NOTE 3 - FAIR VALUE MEASUREMENTS - **SEE ASU 2011-04 TEMPLATE FOR LEVEL 3 DISCLOSURES - INSERT ASU 2011-04 DISCLOSURE AT THE END OF NOTE 3.**

The Partnership follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Partnership's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Partnership's investments and are summarized in the following fair value hierarchy:

- Level 1 - Unadjusted quoted market prices in active markets for identical assets or liabilities that the Partnership has the ability to access at the measurement date.
- Level 2 - Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield-curves, default rates, and similar data.
- Level 3 - Unobservable inputs for the asset or liability to the extent that relevant observable inputs are not available, representing the Partnership's own assumptions about the assumptions that a market participant would use in valuing the asset or liability, and that would be based on the best information available.

Investments for which market quotations are not readily available are fair valued as determined by the General Partner. Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Partnership's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

Partnership uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many investments. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

Fair value pricing may be used where: (i) an investment is illiquid (restricted investments); (ii) the market or exchange for an investment is closed on an ordinary trading day and no other market prices are available; (iii) the investment is so thinly traded that there have been no transactions in the security over an extended period; or (iv) the validity of a market quotation received is questionable. In addition, fair value pricing will be used if emergency or unusual situations have occurred, such as when trading of an investment on an exchange is suspended; or when an event occurs after the close of the exchange on which the investment is principally traded that is likely to have changed the value of the investment.

The use of valuation techniques and the availability of observable inputs can vary from investment to investment and is affected by a wide variety of factors and other characteristics particular to the transaction. As a general principle, the current fair value of an issue of investments being valued by the General Partner would be the amount which the owner might reasonably expect to receive for them upon their current sale. The General Partner may employ a market-based valuation approach which may use related or comparable investments, recent transactions, market multiples, book values, and other relevant information to determine fair value. The General Partner may also use an income-based valuation approach in which anticipated future cash flows of the financial instrument are discounted to calculate fair value. Fair value methods used, which are in accordance with this principle may, for example, be based on (i) a multiple of earnings; (ii) a discount from market of a similar freely traded security (including a derivative security or a basket of investments traded on other markets, exchanges or among dealers); or (iii) yield to maturity with respect to debt issues, or a combination of these and other methods. Good faith pricing is permitted if, in the General Partner's opinion, the validity of market quotations appears to be questionable based on factors such as evidence of a thin market in the security based on a small number of quotations, a significant event occurs after the close of a market but before a Fund's NAV calculation that may affect an investment's value, or the General Partner is aware of any other data that calls into question the reliability of market quotations. Good faith pricing may also be used in instances when the investments the Partnership invests in may default or otherwise cease to have market quotations readily available. [TAILOR THE FOLLOWING:] Factors that may be considered when fair valuing an investment are: fundamental analytical data relating to the investment; evaluation of the forces that influence the market in which the investment is purchased and sold; type of investment or asset; financial statements of issuer; special reports prepared by analysts or the General Partner; information as to any transactions or offers with

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

respect to the investment; and the historical tendency of the investment's price to track or respond to general and specific market movements (in terms of indices, sectors, or other market measurements), liquidity of markets, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Those estimated values do not necessarily represent the amounts that may be ultimately realized due to the occurrence of future circumstances that cannot be reasonably determined. Because of the inherent uncertainty of valuation, those estimated values may be materially higher or lower than the values that would have been used had a ready market for the investments existed, and the differences could be material. Accordingly, the degree of judgment exercised by the Partnership in determining fair value is greatest for investments categorized in Level 3. In certain cases, the level in the fair value hierarchy which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurements falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The valuation techniques used to measure fair value for the year ended December 31, 20XX maximized the use of observable inputs and minimized the use of unobservable inputs.

[ALTERNATE PRESENTATION – IF THERE ARE MULTIPLE LEVELS FOR EACH CLASS, ALTERNATIVE PRESENTATION COULD BE TO INCLUDE THE HIERARCHY LEVELS IN THE CONDENSED SCHEDULE OF INVESTMENTS. IF THAT IS DONE, THE TABLE BELOW IS NOT NEEDED]

The following are the classes of assets and liabilities measured at fair value on a recurring basis during the year ended December 31, 20XX categorized in accordance with the fair value hierarchy:

Total Derivatives	<u>\$100</u>	<u>\$ --</u>	<u>\$450</u>	<u>\$ 550</u>

NOTE: Determine “class” on the basis of the nature and risks of the investments - consider, for example activity or business sector, vintage, geographic concentration, credit quality, and economic characteristic. In addition to nature and risks, also consider placement in fair value hierarchy (i.e., Levels 1, 2, or 3)—e.g., greater number of classes may be necessary for fair value measurements with significant unobservable inputs (Level 3) due to increased uncertainty and subjectivity.

(Note: Class of investment should be determined in a manner consistent with the guidance for major security types in ASC paragraph 320-10-50-1B)

Class Examples to consider are as follows:

- 1) Equity securities, segregated by any one of the following:
 - (a) Industry type
 - (b) Entity size
 - (c) Investment objective;
- 2) Debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies;
- 3) Debt securities issued by states of the United States and political subdivisions of the states;
- 4) Debt securities issued by foreign governments;
- 5) Corporate debt securities;
- 6) Residential mortgage-backed securities;
- 7) Commercial mortgage-backed securities;
- 8) Collateralized debt obligations;
- 9) Other debt obligations.

Settlements	--	--	--	--
Balance – Ending	<u>\$ 350</u>	<u>\$ 45</u>	<u>\$ 600</u>	<u>\$ 995</u>
Net change in unrealized gain (loss) relating to investments still held at December 31, 20XX¹	<u>\$50</u>	<u>\$25</u>	<u>\$--</u>	<u>\$75</u>

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

¹ The unrealized gain (loss) is included in net change in unrealized appreciation (depreciation) on investments and foreign currency transactions in the statement of operations.

^(a) Transferred from Level 2 to Level 3 because of lack of observable market data due to decrease in market activity for these investments.

^(b) Transferred to Level 2 from Level 3 because observable market data was available due to increased liquidity in market activity for these investments.

^(c) Describe the Partnership's policy here if not described elsewhere

[NOTE: The reconciliation is required to be presented not on a derivative-by derivative basis but by "Class" of derivative contract].

Level 3 Rollforward:	Interest Rate Contracts	Foreign Exchange Contracts	Commodity Futures	Total Fair Value
Balance - Beginning	\$ 250	\$ 675	\$ --	\$ 925
Total gains or (losses)	10	(500)	(30)	(520)
Transfers	--	--	--	--
Purchases	--	--	230	230
Sales ⁽¹⁾	--	--	--	--
Issuances	--	(150)	--	(150)
Settlements ⁽²⁾	<u>(110)</u>	<u>75</u>	<u>--</u>	<u>(35)</u>
Balance - Ending	<u>\$ 150</u>	<u>\$ 100</u>	<u>\$ 200</u>	<u>\$ 450</u>

⁽¹⁾ If a reporting entity assigns a derivative asset to a third party for consideration, the payment should be presented in the sales line item. An assignment of a derivative liability should be disclosed not as a sale but as a settlement (see the Settlements discussion below for further details).

⁽²⁾ All ongoing contractual cash payments (or other consideration) made under the derivative contract should be disclosed in the settlements line item. This includes payments on a multi-period settled derivative (e.g., interest rate swaps that net-cash settle quarterly) or payments between the entity and counterparty to terminate a derivative or to exercise an option.

^(a) In addition, if a reporting entity assigns a derivative liability to a third party and is required to make a payment to the third party as part of the transaction, the payment should be presented in the settlements line item and accompanied by separate disclosure describing the nature of the assignment transaction and the settlement amount related to the transaction. An assignment of a derivative liability is akin to an early termination and thus a settlement of the original derivative. Alternatively, an entity may adopt a policy of presenting the consideration related to assignments of derivative liabilities in a separate line item other than purchases, sales, issuances, or settlements with disclosure describing the nature of the assignment transactions.

(B) Disclose if the Partnership has adopted ASU 2018-13]

NOTE:

-FOR EACH TYPE/CLASS (SEE LIST ABOVE FOR EXAMPLES) OF ASSET OR LIABILITY CLASSIFIED AS LEVEL 3 IN THE FAIR VALUE HIERARCHY TABLE, THE PARTNERSHIP MUST DISCLOSE TRANSFERS IN AND OUT OF LEVEL 3 AND PURCHASES AND ISSUANCES OF LEVEL 3 INVESTMENTS.

-PURCHASES, ISSUANCES AND TRANSFERS OF LEVEL 3 ASSETS AND LIABILITIES SHOULD BE DISCLOSED SEPARATELY.

-PURCHASES, ISSUANCES AND TRANSFERS OF LEVEL 3 INVESTMENTS MUST BE GROSSED UP. NETTING IS NOT PERMITTED.

Purchases, issuance and transfers of Level 3 assets and liabilities for the year ended December 31, 20XX were as follows:

Level 3 Activity:	Residential Mortgage Backed Securities	Loan Assignments and Participations	Convertible Preferred Stocks	Total Fair Value
Transfers into Level 3	200 ^(a)	--	--	200
Transfers out of Level 3	--	(50) ^(b)	--	(50)
Purchases	--	--	1,100	1,100
Issuances	--	--	--	--

^(a) Transferred from Level 2 to Level 3 because of lack of observable market data due to decrease in market activity for these investments.

^(b) Transferred to Level 2 from Level 3 because observable market data was available due to increased liquidity in market activity for these investments.

NOTE:

-IF THE PARTNERSHIP HOLDS ONLY A SINGLE TYPE/CLASS (SEE LIST ABOVE FOR EXAMPLES) OF ASSET OR LIABILITY CLASSIFIED AS LEVEL 3 IN THE FAIR VALUE HIERARCHY TABLE, A TABULAR PRESENTATION MAY NOT BE WARRANTED AND A NARRATIVE PRESENTATION OF LEVEL 3 PURCHASES, ISSUANCES AND TRANSFERS MAY BE PREFERABLE.

Transfers	--	--	--	--
Purchases	--	--	230	230
Issuances	--	(150)	--	(150)

INSERT SPECIFIC FAIR VALUE MEASUREMENTS USED- EXAMPLES ARE AS FOLLOWS:

Tailor any of the following paragraphs to be specific to the entity’s PP Memorandum (as long as in compliance with ASC 820 - investments should be consistent with ASC 820 note)

VALUATION TECHNIQUES

A description of the valuation techniques applied to the Partnership’s major classes of assets and liabilities measured at fair value on a recurring basis follows.

Equity Securities

Equity securities including common stock, American Depositary Receipts, real estate investment trusts, income trusts, warrants and preferred securities, are generally valued by using market quotations, but may be valued on the basis of prices furnished by a pricing service when the General Partner believes such prices more accurately reflect the fair value of such investments. Investments that are traded on any stock exchange are generally valued by the pricing service at the last quoted sale price. Lacking a last sale price, an exchange traded security is generally valued by the pricing service at its last bid price if held long and the last asked price if sold short. Investments traded in the NASDAQ over-the-counter market are generally valued by the pricing service at the NASDAQ Official Closing Price. When using the market quotations or close prices provided by the pricing service and when the market is considered active, the security will be classified as a Level 1 security. Sometimes, an equity security owned by a Partnership will be valued by the pricing service with factors other than market quotations when the market is considered inactive or when referenced to similar instruments. When this happens, the security will be classified as a Level 2 security. When market quotations are not readily available, when the General Partner determines that the market quotation or the price provided by the pricing service does not accurately reflect the

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Equity Securities (continued)

current fair value, or when certain restricted or illiquid investments are being valued, such investments are valued as determined in good faith by the General Partner, **[in conformity with guidelines adopted by and subject to review by the Board]**. These investments will be categorized as Level 3 investments. The General Partner has used inputs such as the financial condition of underlying issuers, anticipated restructuring settlements, and expected liquidation proceeds in determining the fair value of such Level 3 investments.

Unlisted or listed investments for which closing sales prices or closing quotations are not available are valued at the mean between the latest available bid and asked prices or, in the case of preferred equity investments that are not listed or traded in the over-the-counter market, by a third party pricing service that will use various techniques that consider factors including, but not limited to, prices or yields of investments with similar characteristics, benchmark yields, broker/dealer quotes, quotes of underlying common stock, issuer spreads, as well as industry and economic events.

Investments in mutual funds, including money market mutual funds, are generally priced at the ending net asset value (NAV) provided by the service agent of the funds. These investments will be categorized as Level 1 investments.

Fixed Income Securities:

Fixed income securities such as corporate bonds, restricted corporate bonds, asset-backed securities, certificates of deposit, convertible notes, U.S. government securities and U.S. government agency securities, and foreign bonds denominated in U.S. dollars, when valued using market quotations in an active market, will be categorized as Level 1 investments. However, they may be valued on the basis of prices furnished by a pricing service when the General Partner believes such prices more accurately reflect the fair value of such investments. A pricing service utilizes electronic data processing techniques based on yield spreads relating to investments with similar characteristics to determine prices for normal institutional-size trading units of debt investments without regard to sale or bid prices. These investments will generally be categorized as Level 2 investments. If the General Partner decides that a price provided by the pricing service does not accurately reflect the fair value of the investments, when prices are not readily available from a pricing service, or when certain restricted or illiquid investments are being valued, investments are valued at fair value as determined in good faith by the General Partner, in conformity with guidelines adopted by and subject to review of the Valuation Committee. These investments will be categorized as Level 3 investments. The General Partner has used inputs such as evaluated broker quotes in inactive markets, actual trade prices in relatively inactive markets, multiples of earnings, yields on similar investments, and expected liquidation proceeds in determining the fair value of such Level 3 investments.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Fixed Income Securities (continued)

Short-term investments in fixed income investments (those with maturities of less than 60 days when acquired, or which subsequently are within 60 days of maturity), are valued by using the amortized cost method of valuation, which the Board has determined represents fair value. These investments will be categorized as Level 2 investments.

Foreign Securities and Currencies

Foreign securities and currencies are valued in U.S. dollars, based on foreign currency exchange rate quotations supplied by a third party pricing service. The pricing service uses a proprietary model to determine the exchange rate. Inputs to the model include reported trades and implied bid/ask spreads. The daily valuation of exchange-traded foreign securities generally is determined as of the close of trading on the principal exchange on which such investments trade. Events occurring after the close of trading on foreign exchanges may result in adjustments to the valuation of foreign investments to more accurately reflect their fair value as

of the close of regular trading on the New York Stock Exchange. When valuing foreign equity investments that meet certain criteria, the General Partner has approved the use of a fair value service that values such investments to reflect market trading that occurs after the close of the applicable foreign markets of comparable investments or other instruments that have a strong correlation to the fair-valued investments.

Debt Securities

Debt instruments with remaining maturities of sixty days or less that are not credit impaired are valued at amortized cost, unless the General Partner determines such amount does not reflect the investments' fair value, in which case these investments will be fair valued as determined by the General Partner. Debt instruments having a maturity greater than sixty days for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price. Debt investments acquired with more than 60 days to maturity are fair valued using matrix pricing methods determined by an independent pricing service which takes into consideration such factors as similar security prices, yields, maturities, liquidity and ratings. Investments for which valuations are not readily available from an independent pricing service may be valued by brokers, which use prices provided by market makers or estimates of fair market value obtained from yield data relating to investments or instruments with similar characteristics. Depending on the relative significance of valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Government Bonds

The fair value of sovereign government bonds is generally based on quoted prices in active markets. When quoted prices are not available, fair value is determined based on a valuation model that uses inputs that include interest rate yield curves, cross-currency basis index spreads, and country credit spreads similar to the bond in terms of issuer, maturity and seniority. Sovereign government bonds are generally categorized in Levels 1 or 2 of the fair value hierarchy. **[Include/modify the description of the valuation techniques and the inputs used in the fair value of Level 2 government bonds, if necessary].**

U.S. Government Securities

U.S. government securities are normally valued using a model that incorporates market observable data such as reported sales of similar investments, broker quotes, yields, bids, offers, and reference data. Certain investments are valued principally using dealer quotations. U.S. government securities are categorized in Level 1 or Level 2 of the fair value hierarchy depending on the inputs used and market activity levels for specific investments. **[Include/modify the description of the valuation techniques and the inputs used in the fair value of Level 2 government securities, if necessary].**

Municipal Bonds

The fair value of municipal bonds is estimated using recently executed transactions, market price quotations and pricing models that factor in, where applicable, interest rates, bond or credit default swap spreads and volatility. Municipal bonds are generally categorized in Level 2 of the fair value hierarchy. **[Include/modify the description of the valuation techniques and the inputs used in the fair value of Level 2 municipal bonds, if necessary].**

Corporate Bonds

The fair value of corporate bonds is estimated using recently executed transactions in investments of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer or credit default swap spreads. The spread data used is for the same maturity as the bond. If the spread data does not reference the issuer, then data that references a comparable issuer is used. When observable price quotations are not available, fair value is determined based on cash flow models with yield curves, bond or single name credit default swap spreads and recovery rates based on collateral values as key inputs. Corporate bonds are generally categorized in Levels 1 or 2 of the fair value hierarchy. In instances where significant inputs are unobservable, they are categorized in Level 3 of the hierarchy. **[Include/modify the description of the valuation techniques and the inputs used in the fair value of Level 2 corporate bonds, if necessary].**

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Commercial Mortgage-Backed Securities (“CMBS”) and Asset-Backed Securities (“ABS”)

CMBS and ABS may be valued based on external price/spread data. When position-specific external price data is not observable, the valuation is based on prices of comparable investments or cash flow modes that consider inputs including default rates, conditional prepayment rates, loss severities, expected yield to maturity, and other inputs specific to each security. Included in this category are certain interest-only investments which, in the absence of market prices, are valued as a function of observable whole bond prices and cash flow values of principal-only bonds using current market assumptions at the measurement date. CMBS and ABS are categorized in Level 2 of the fair value hierarchy when external pricing data is observable and in Level 3 when external pricing data is unobservable. At December 31, 20XX, the Partnership had investments in ABS of \$XX,XXX,XXX included in Level 3 of the fair value hierarchy. These investments represent senior tranches in various securitization trusts. The underlying loans for these investments include small business loans and credit card receivables that were originated between 20XX and 20XX.

Derivative Instruments

The Partnership records its derivative activities at fair value. Gains and losses from derivative contracts are included in net (loss) from derivative contracts in the statement of operations. The Partnership considers the effects of credit risk and counterparty risk when determining the fair value of its derivatives.

Option Contracts

Options which are listed on major securities exchanges are valued at their last reported sales price as of the valuation date or based on the midpoint of the bid-ask spread at the close of business on the valuation date as reported by the [Options Price Reporting Authority] for U.S. listed options or by the relevant exchange or board of trade for non-U.S. listed options. Over-the-counter options are valued by a third party pricing service using techniques that consider factors including the value of the underlying instrument, the volatility of the underlying instrument and the period of time until option expiration. Depending on the frequency of trading, listed options are generally classified in Level 1 or 2 of the fair value hierarchy.

Futures Contracts

Futures contracts which are listed on major securities exchanges are valued at their last reported sales price as of the valuation date. Listed futures contracts are generally classified in Level 1 of the fair value hierarchy.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Warrants

Warrants which are listed on securities exchanges are valued at their last reported sales price as of the valuation date. The fair value of OTC warrants are valued using the Black-Scholes option pricing model. This model takes into account the contract terms (including as well as inputs, including time value, volatility, equity prices, interest rates and currency rates. Warrants are generally categorized in Levels 2 or 3 of the fair value hierarchy.

Contracts for Differences

Contracts for differences are traded on the OTC market. The fair value of contracts for differences is derived by taking the difference between the quoted price of the underlying security and the contract price. Contracts for differences are generally categorized in Level 2 of the fair value hierarchy.

Forward Contracts

Forward contracts are traded on the OTC market. The fair value of forward contracts are valued using observable inputs, such as currency exchange rates or commodity prices, applied to notional amounts stated in the applicable contracts. Forward contracts are generally categorized in Level 2 of the fair value hierarchy.

Interest Rate Swaps

Interest rate swaps are traded on the OTC market. The fair value for interest rate swap contracts is derived using a pricing model that is widely accepted by marketplace participants. The pricing model takes into account the contract terms (including maturity) as well as multiple inputs, including, where applicable, interest rates, prepayment speeds and currency rates. Many inputs into the model do not require material subjectivity as they are observable in the marketplace. Interest rate swaps are generally categorized in Level 2 of the fair value hierarchy.

Total Return Swaps

Total return swaps are traded on the OTC market. The fair value of total return swaps is recorded at the swap contract's net equity value. Net equity is calculated by determining the notional fair value of the assets or liabilities underlying the swap contracts, which are typically equity investments, and is consistent with the valuation procedures discussed previously. Total return swaps are generally categorized in Level 2 of the fair value hierarchy.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Credit Default Swaps

Credit default swaps are traded on the OTC market. The fair value for a credit default swap contract is derived using a pricing model that is widely accepted by marketplace participants. The pricing model takes into account multiple inputs including specific contract terms (including maturity), interest rate yield curves, interest rates, credit curves, recovery rates, and current credit spreads obtained from swap counterparties and other market participants. Many inputs into the model do not require material subjectivity as they are observable in the marketplace or set per the contract. Other than the contract terms, valuation is heavily determined by the difference between the contract spread and the current market spread. The contract spread (or rate) is generally fixed and the market spread is determined by the credit risk of the underlying debt or reference entity. If the underlying debt is liquid and the OTC market for the current spreads is active, credit default swaps are categorized in Level 2 of the fair value hierarchy. If the underlying debt is illiquid and the OTC market for the current spread is not active, credit default swaps are categorized in Level 3 of the fair value hierarchy. At December 31, 20XX, investments in credit default swaps had maturities within a range of X and XX years.

Investments in Private Operating Companies

The Partnership's investments in private operating companies consist of direct private common and preferred stock (together or individually "equity") investments. The transaction price, excluding transaction costs, is typically the Partnership's best estimate of fair value at inception. When evidence supports a change to the carrying value from the transaction price, adjustments are made to reflect expected exit values in the investment's principal market under current market conditions. Ongoing reviews by Partnership management are based on an assessment of each underlying investment from the inception date through the most recent valuation date. These assessments typically incorporate valuation techniques that consider the evaluation of financing and sale transactions with third parties, an income approach reflecting a discounted cash flow analysis using an appropriate risk-adjusted discount rate, and a market approach that includes comparative analysis of acquisition multiples and pricing multiples generated by market participants. In certain instances, the Partnership may use multiple valuation methodologies for a particular investment and estimate its fair value based on a weighted average or a selected outcome within a range of multiple valuation results.

The Partnership uses the guideline company method of the market approach which involves selecting companies that are similar in size, operating strategy, market position and/or geographic location to the target company. Inputs relied upon by the income approach include annual projected cash flows for each investment through their respective investment horizons. The cash flow assumption may be probability-weighted to reflect the risks associated with

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Investments in Private Operating Companies (continued)

achieving expected performance levels across various business scenarios. Investments valued using a market approach utilized valuation multiples times the annual earnings before interest, taxes, depreciation and amortization (“EBITDA”), or another performance metric such as net earnings or revenues.

The selected valuation multiples were estimated through comparative analysis of the performance and characteristics of each investment within a range of comparable companies or transactions in the observable marketplace.

Investments in private operating companies also consist of direct private debt investments. The transaction price, excluding transaction costs, is typically the Partnership’s best estimate of fair value at inception. When evidence supports a change to the carrying value from the transaction price, adjustments are made to reflect expected exit values in the investment’s principal market under current market conditions. Ongoing reviews by management are based on an assessment of each underlying investment from the inception date through the most recent valuation date. These assessments typically incorporate valuation techniques that consider trends in the performance and credit profile of each underlying investment, evaluation of arm’s length financing, an income approach based upon a discounted cash flow analysis and sales transactions with third parties. Inputs relied upon by debt investments using the income approach include an understanding of the underlying company’s compliance with debt covenants, the operating performance of the underlying company, trends in liquidity and financial leverage ratios of the underlying company from the point of the original investment to the stated valuation date, an assessment of the credit profile of the underlying company from the original investment to the stated valuation date, as well as an assessment of the underlying company’s business enterprise value, liquidation value and debt repayment capacity of each subject debt investment. In addition, inputs include an assessment of potential yield adjustments for each debt investment based upon trends in the credit profile of the underlying company and trends in the interest rate environment from the date of the original investment to the stated valuation date.

These investments in private operating companies are generally included in Level 3 of the fair value hierarchy.

[IF DISAGGREGATED ON THE ASU 2011-04 TABLE THE FOLLOWING IS NOT NECESSARY:]

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Investments in Private Operating Companies (continued)

At December 31, 20XX, the approximate fair values of the Partnership's equity and debt investments in private operating companies, by valuation methodology, are as follows:

	Common Stocks	Preferred Stocks	Debt Securities	Total
Third party transactions				
Income approach				
Market approach				
Blended approach				

Private Investments in Public Equity

The Partnership invests in private investments in public equities ("PIPE's") consisting of unregistered shares of common stock, convertible debentures, convertible preferred and/or warrants issued by public companies. The shares of stock and the underlying shares of stock related to the convertible debentures are required to be registered at a future date specified in the transaction documents. The shares (and the underlying shares) issued in connection with the PIPE transaction are not registered at the date of issuance. The Partnership may resell the shares (and the underlying shares) after the applicable holding period expires pursuant to Rule 144 of the Securities Act of 1933. Historically, such shares become registered within 90 days of purchase. Since these shares are not readily available for sale, their acquisition poses a greater risk of illiquidity. **[The Partnership may hedge as many of its unregistered PIPE positions as possible, typically by selling short the same security, in order to minimize the risk of a decline in market price of the investee company's shares. The fair value of the hedged portions of the investments is stated at the market price at the end of the last trading day of the reporting period. The fair value of unhedged positions will be valued as determined by the General Partner in accordance with the Partnership's valuation policy. DESCRIBE GENERALLY HERE AND IF A LEVEL 3 INVESTMENT LIST INPUTS AND TECHNIQUES ON THE ASU 2011-04 TABLE]** Investments in PIPE's are generally included in Level 3 of the fair value hierarchy. **[Include/modify the description of the valuation techniques and the inputs used in the fair value of PIPES].**

Investments in Special Purpose Vehicles

The Partnership's investments in special purpose vehicles ("SPVs") are either offshore private investment companies or United States corporations that invest directly or indirectly through joint ventures or United States limited liability companies in private equity or debt investments, real estate or intangible property. The valuation of the Partnership's SPVs may depend on whether the SPV is required to be accounted for as an investment company under GAAP.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Investments in Special Purpose Vehicles (continued)

If a SPV is accounted for as an investment company, the Partnership generally values the investment, as a practical expedient, using the net asset values provided by the SPV when the NAV is calculated in a manner consistent with GAAP for investment companies. The Partnership applies the practical expedient to eligible SPVs on an investment-by-investment basis and consistently with the Partnership's entire position in a particular investment, unless it is probable that the Partnership will sell a portion of an investment at an amount different from the NAV of the investment.

If a SPV is not accounted for as an investment company, the SPV may be valued in its entirety using an income approach or a market approach. **[See the Private Operating Companies section for examples of valuation techniques and inputs that may apply to SPVs.]** In certain instances, a SPV may be valued based on the evaluation of the net assets of the SPV, whereby the assets and liabilities of the SPV are valued based on each underlying investment within the SPV, incorporating valuations that consider the evaluation of financing and sale transactions with third parties, expected cash flows and market-based information including comparable transactions, and performance multiples, among other factors.

SPVs are generally categorized in Level 3 of the fair value hierarchy. **[Note: This paragraph does not apply to SPVs valued using NAV as a practical expedient.]**

OR

At various times, the Partnership may utilize special-purpose vehicles ("SPVs") in the investment process. The Partnership advances money to these SPVs for the specific purpose of investing in securities on behalf of the Partnership (an "SPV Investment"). When the Partnership makes an SPV Investment, the investment is held through the Partnership's interest in the respective SPV. The Partnership presents and fair values its SPV Investments in the financial statements as if they were owned directly by the Partnership and the SPVs have been disregarded for presentation purposes as a result of the following: (1) an SPV Investment is the sole activity of the SPV; (2) the Partnership's underlying ownership of the SPV is proportionate to the contributions made by the SPV members; and (3) the Partnership will receive the exact proportion of cash proceeds as the SPV Investment is monetized and distributed. The SPVs may incur a tax liability associated with distributions made by underlying portfolio investments.

As discussed above, since the Partnership is not subject to any direct taxation, any taxes incurred would be taxed to the individual partners who are responsible for their proportionate share.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Investments in Private Investment Companies (SEE FUND OF FUND TEMPLATE FOR ADDITIONAL DISCLOSURES WHEN USING THE PRACTICAL EXPEDIENT AS FAIR VALUE)

Investments in Private Investment Companies

Investments in private investment companies are valued, as a practical expedient, utilizing the net asset valuations provided by the underlying private investment companies and/or their administrators, without adjustment, when the net asset valuations of the investments are calculated (or adjusted by the Partnership if necessary) in a manner consistent with U.S. GAAP for investment companies. The Partnership applies the practical expedient to its investments in private investment companies on an investment-by-investment basis, and consistently with the Partnership's entire position in a particular investment, unless it is probable that the Partnership will sell a portion of an investment at an amount different from the net asset valuation. If it is probable that the Partnership will sell an investment at an amount different from the net asset valuation or in other situations where the practical expedient is not available, the Partnership considers other factors in addition to the net asset valuation, such as features of the investment including subscription and redemption rights, expected discounted cash flows, transactions in the secondary market, bids received from potential buyers, and overall market conditions in its determination of fair value.

Investments in Private Investment Companies

The Partnership values investments in private investment companies that do not qualify for the practical expedient based on the Partnership's estimates of secondary market transactions for those investments. Those estimates are typically based on adjustments to the NAV per share (or its equivalent) using inputs such as transactions in principal-to-principal or brokered markets; benchmarks, indexes, expected returns and historical returns of comparable funds; features of the investment; expected discounted future cash flows; and overall market conditions. Investments in private investment companies that are not valued using the practical expedient are typically classified in Level 3 of the fair value hierarchy.

Restricted Securities (Public Companies)

Investments in restricted securities of public companies cannot be offered for sale to the public until the Partnership complies with certain statutory requirements. The valuation of the investments by management takes into consideration the type and duration of the restriction, but in no event does the valuation exceed the listed price on a national securities exchange or the NASDAQ national market. The Partnership may apply liquidity discounts to similar publicly traded securities which consider the respective financial performance of the public companies and expected holding period for the restrictions. Investments in restricted securities

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Restricted Securities (Public Companies) (continued)

of public companies are generally included in Level 2 of the fair value hierarchy. However, to the extent that significant inputs used to determine liquidity discounts are not observable, investments in restricted securities in public companies may be included in Level 3 of the fair value hierarchy. **[Include/modify the description of the valuation techniques and the inputs used in the fair value of Level 2 restricted securities, if necessary].**

Restricted securities (equity and debt-non public companies)

Restricted securities for which quotations are not readily available are valued at fair value as determined by the General Partner. Restricted securities issued by nonpublic entities may be valued by reference to comparable public entities and/or fundamental data relating to the issuer which considers the respective financial performance and expected holding period for the restrictions. Depending on the relative significance of valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy. **[Include/modify the description of the valuation techniques and the inputs used in the fair value of Level 2 restricted securities, if necessary].**

Physical commodities

Physical commodities are valued using the most recent prices from established commodity exchanges, less estimated transportation costs. Physical commodities are generally categorized in Level 2 of the fair value hierarchy.

Repurchase agreements

The Partnership records repurchase agreements at their contracted resell amounts, which approximate fair value. Interest on repurchase agreements is included in interest receivable in the statement of assets and liabilities. Repurchase agreements are generally categorized in Level 2 of the fair value hierarchy.

Contingent consideration

The Partnership may sell its portfolio investments and receive the proceeds from such disposition in installments. Proceeds anticipated, but not yet received, are fair valued and included in escrow receivable on the statement of financial condition. Escrow receivables are expected to be funded and available for release to the Partnership based on the requirements in the purchase and sales agreements between the Partnership and the purchasing entities. The General Partner of the Partnership has been notified by the purchasing entities of certain claims against the escrow receivables.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES AND INPUTS (CONTINUED)

Contingent consideration (continued)

At December 31, 20XX, the total escrow balances potentially available for distribution to the Partnership were **[\$insert amount]**. The Partnership has fair valued its escrow receivable at **[\$insert amount]**, which reflects the General Partner's best estimate of the amounts that will ultimately be collected by the Partnership. The escrow receivable as of December 31, 20XX is expected to be received by 20XX.

The Partnership recognizes contingent consideration (Escrow receivable amounts) from the sale of liquidated investments as a financial asset measured at fair value. Contingent consideration refers to additional amounts from liquidated investments that management believes may be realized at future dates and/or as future events occur. The terms of these milestones are generally defined in the sales agreements of the liquidated investment. The amount of the actual milestone payments ultimately received by the Partnership may vary depending on whether the future milestone events occur. The fair value reflects the General Partner's best estimate of the amounts that will ultimately be collected by the Partnership. The escrow balances are anticipated to be released to the Partnership pending the occurrence of future dates or future events. Due to the uncertainty surrounding the collection of these balances, the General Partner has estimated the fair value of the escrow balances to reflect a discount of **[insert%]** to **[insert%]** of the balances held in the Partnership's various escrow accounts. At December 31, 2016 the fair value of the Partnership's escrow receivable was **[\$insert amount]**.

[IF THE FUND HOLDS LEVEL 3 INVESTMENTS INSERT ASU 2011-04 DISCLOSURE HERE.]

NOTE 4 - DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

In the normal course of business, the Partnership utilizes derivative financial instruments in connection with its proprietary trading activities. Investments in derivative contracts are subject to additional risks that can result in a loss of all or part of an investment. In addition to its primary underlying risks, the Partnership is also subject to additional counterparty risk should its counterparties fail to meet the terms of their contracts. The Partnership records its derivative activities at fair value. Derivative contracts include forward, future, swap, warrant and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices or commodity prices. See Note 7 for additional risks associated with derivatives still held as of December 31, 20XX. **[New ASU 2011-11 Balance Sheet Offsetting Disclosure Requirement: Add the following sentence if the Fund's derivatives consist only of equity options NOT traded on margin and no master netting arrangement exists:]** As of December 31, 20XX, the Partnership's financial instruments and derivative instruments are not subject to a master netting arrangement.

The principal types of derivatives utilized by the Partnership, as well as the methods in which they may be used are:

INSERT ADDITIONAL DERIVATIVES AND/OR TAILOR THE DISCLOSURE BELOW TO REFLECT SPECIFIC DERIVATIVES USED BY THE PARTNERSHIP

FORWARD FOREIGN CURRENCY EXCHANGE CONTRACTS

The Partnership may enter into forward foreign currency exchange contracts primarily to hedge against foreign currency exchange rate risks on its non-U.S. Dollar denominated investments. When entering into a forward currency contract, the Partnership agrees to receive or deliver a fixed quantity of foreign currency for an agreed upon price on an agreed upon future date. A forward contract is marked-to-market daily, and the unrealized gain or loss on the contract, which is measured by the difference between the contract rate and the applicable forward rate applied to the face amount of the forward contract, is recorded in the statement of operations. Any realized gains or losses on forward contracts are recorded in the statement of operations on the expiration date of the contract.

FORWARD CONTRACT

The Partnership enters into forward contracts to hedge itself against foreign currency exchange rate risk for its foreign currency denominated assets and liabilities due to adverse foreign currency fluctuations against the U.S. Dollar, and to manage the price risk associated with its commodity portfolio positions. A forward contract is marked-to-market daily, and the unrealized gain or loss on the contract, which is measured by the difference between the contract rate and the applicable forward rate applied to the face amount of the forward contract, is recorded in the statement of operations. Any realized gains or losses on forward contracts are recorded in the statement of operations on the expiration date of the contract.

FUTURES CONTRACTS

The Partnership uses futures contracts to gain exposure to, or hedge against, changes in the value of equities and commodities, interest rates or foreign currencies. A futures contract is a firm commitment to buy or sell a specified quantity of currency or securities, or a standardized amount of a deliverable grade commodity, at a specified price and specified future date, unless the contract is closed before the delivery date. Upon entering into a futures contract, the Partnership is required to pledge to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial margin deposit). Subsequent payments, known as “variation margin”, are made or received by the Partnership each day, depending on the daily fluctuations in the fair value of the underlying security. The Partnership records an unrealized gain or loss equal to the daily variation margin. When the contract is closed, the Partnership records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 4 - DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES (CONTINUED)

OPTIONS

The Partnership enters into options to speculate on the price movements of the financial instrument underlying the option, or for use as an economic hedge against certain equity positions held in the Partnership's portfolio holdings. Option contracts give the Partnership the right, but not the obligation, to buy or sell within a limited time, a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

WARRANTS

The Partnership may purchase warrants in the normal course of pursuing its investment objectives or receive warrants from its portfolio companies upon an investment in the debt or equity of a portfolio company. Warrants provide the Partnership with exposure and potential gains upon equity appreciation of the portfolio company's share price. The value of a warrant has two components—time value and intrinsic value. A warrant has a limited life and expires on a certain date.

[INCLUDE ONLY IF PARTNERSHIP WRITES OPTIONS.]

OPTION WRITING

When the Partnership writes an option, an amount equal to the premium received by the Partnership is recorded as a liability and is subsequently adjusted to the current fair market value of the option written. Premiums received from writing options that expire unexercised are treated by the Partnership, on the expiration date, as realized gains from investments. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security or currency in determining whether the Partnership has realized a gain or loss. If a put option is exercised, the premium reduces the cost basis of the investments purchased by the Partnership.

SWAP AGREEMENTS

The Partnership may invest in equity swap contracts, including contracts for differences ("CFDs"). An equity swap is an agreement to exchange a market-linked return generated by an instrument for interest based on a predetermined notional amount. CFDs are single name equity swaps, which are used in lieu of making investments directly in securities in certain

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

NOTE 4 - DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES (CONTINUED)

SWAP AGREEMENTS (CONTINUED)

countries where this is advantageous, particularly the United Kingdom. Swaps and CFDs are marked-to-market, based upon the market value of the underlying security and the change, if any, is recorded as unrealized gain or loss in the statement of operations. Realized gains or losses on swaps and CFDs are recorded in the statement of operations upon the termination date or the reset date of the contracts.

SWAP CONTRACTS

The Partnership enters into various swap contracts, including interest rate swaps, total return swaps, and credit default swaps as part of its investment strategies to hedge against unfavorable changes in the value of investments and to protect against adverse movements in interest rates or credit performance with counterparties. Generally, a swap contract is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified notional amount of the underlying assets. The payment flows are usually netted against each other, with the difference being paid by one party to the other. During the term of the swaps, changes in value are recognized as unrealized gains or losses by marking the contracts to fair value. Additionally, the Partnership records a realized gain (loss) when a swap contract is terminated and when periodic payments are received or made at the end of each measurement period, but prior to termination. Unrealized gains (losses), realized gains (losses) and periodic payments are reflected in net realized and unrealized gain (loss) on derivative contracts in the statement of operations.

INTEREST RATE SWAPS

The Partnership enters into interest rate swap contracts to protect against adverse movements in the interest rates. Interest rate swaps are contracts whereby counterparties exchange different rates of interest on a specified notional amount for a specified period of time. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The Partnership's interest rate swap contracts are scheduled to terminate from 20XX through 20XX.

The Partnership enters into total return swaps to obtain leverage on its investments and to manage its exposure to [the market or certain sectors of the market, or to create exposure to certain equities] to which it is otherwise not exposed. Total return swap contracts involve the exchange by the Partnership and a counterparty of their respective commitments to pay or receive a net amount based on the change in the fair value of a particular security or index and a specified notional amount. The Partnership's total return swap contracts are scheduled to terminate from 20XX through 20XX

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

NOTE 4 - DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES (CONTINUED)

CREDIT DEFAULT SWAPS

The Partnership enters into credit default swaps to manage its exposure to the market or certain sectors of the market, to reduce its risk exposure to defaults of corporate and sovereign issuers, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. Credit default swap contracts involve an arrangement between the Partnership and a counterparty which allow the Partnership to protect against losses incurred as a result of default by a specified reference entity. The Partnership pays a premium and the counterparty agrees to make a payment to compensate the Partnership for losses upon the occurrence of a specified credit event. Generally, the Partnership pays a premium upfront and the counterparty agrees to make a payment to compensate the Partnership for losses upon the occurrence of a specified credit event. The Partnership's credit default swap contracts are scheduled to terminate from 20XX through 20XX

NOTE 7 - CONTRIBUTIONS, WITHDRAWALS AND ALLOCATIONS (CONTINUED)

WITHDRAWALS (CONTINUED)

[If applicable, add disclosure of gate provisions.]

[Additionally, withdrawals in the Partnership may be limited due to a discretionary “gate” that may be imposed by the General Partner. Partnerships typically exercise gates when withdrawal requests exceed a specified percentage of the overall Partners’ Capital. Gates are imposed to prevent disorderly withdrawals and may limit the amount of capital allowed to be withdrawn from the Partnership on given withdrawal dates.]

[If applicable, add disclosure on General Partner’s right to suspend withdrawals.]

[If Partnership has investments in side pockets, add disclosures about withdrawal restrictions from PPM. Disclose \$XX of investments in side pockets.]

NET INCOME/LOSS AND INCENTIVE ALLOCATIONS

The Partnership’s net income or loss shall be allocated to each partner in proportion to its opening capital balance for each fiscal period. At the end of each year, an incentive allocation equal to [insert #]% of the net income [including realized and unrealized gains] allocated to each limited partner will be reallocated to the capital account of the General Partner subject to any prior year loss carryforwards or high water mark provision. The General Partner may reduce or waive the incentive allocation with respect to one or more limited partners for any period of time.

NOTE 8 - PRINCIPAL RISKS

Elaborate on types of risk (for example, use language from PPM. NOTE – THE DERIVATIVES RISK DISCLOSURE INCLUDED HERE SHOULD MATCH TO THE SPECIFIC DERIVATIVES THAT THE PARTNERSHIP IS INVESTED IN AND STILL HOLDS AT PERIOD END.

CONCENTRATION OF CREDIT RISK

The Partnership maintains its cash at [insert number] institution/s which is/are insured by the Federal Deposit Insurance Corporation (“FDIC”) and/or Securities Investor Protection Corporation (“SIPC”). At December 31, 20XX, the Partnership had cash and investment balances held at its bank/broker in excess of the maximum amounts insured. The Partnership is subject to credit risk to the extent any financial institution with which it conducts business is unable to fulfill contractual obligations on its behalf.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 8 - PRINCIPAL RISKS (CONTINUED)

FINANCIAL INSTRUMENTS

In the normal course of its business, the Partnership enters into various financial transactions with risk where the risk of potential loss due to changes in the market (market risk), failure of the other party to the transaction to perform (credit risk) or changes in foreign exchange rates (currency risk) exceeds the related amounts recorded. These transactions give rise to varying degrees of market, credit and currency risk depending on the counterparties used, trading strategies employed and fluctuations in the values of the underlying financial instruments or currencies. The Partnership is also exposed to interest rate risk when there is an unfavorable change in the value of investments as a result of adverse movements in the market interest rates.

LIQUIDITY RISK

Liquidity risk arises in the general funding of the Partnership's trading activities. It includes the risks of not being able to fund trading activities at settlement dates and liquidate positions in a timely manner at a reasonable price. **[since a significant amount of its investments are in PIPEs, which have a greater risk of illiquidity (See Note 3)]**The Partnership manages its liquidity risk by investing primarily in marketable investments and financing its trading activities using traditional margin arrangements. **[If preceding sentence is not applicable, add language specific to the Partnership.]** Generally, the financial instruments can be closed out at the discretion of the General Partner. An illiquid or closed market, however, could prevent the closeout of positions.

FOREIGN SECURITIES/EMERGING MARKET RISK

Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, certain foreign securities may not be as liquid as U.S. securities. Investing in emerging markets may accentuate these risks.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 8 - PRINCIPAL RISKS (CONTINUED)

INVESTMENTS IN DERIVATIVES RISK (ALSO SEE NOTE 4)

ONLY INCLUDE THE RISKS BELOW IF THE DERIVATIVE IS STILL HELD AT PERIOD END

Futures Contracts

Futures contracts provide reduced counterparty risk to the Partnership since futures are exchange-traded; and the exchange's clearinghouse, as the counterparty to all exchange-traded futures, guarantees the futures against default. The Commodity Exchange Act requires a Futures Commission Merchant ("FCM") to segregate all customer transactions and assets from the FCM's proprietary activities. A customer's cash and other equity deposited with an FCM are considered commingled with all other customer funds subject to the FCM's segregation requirements. In the event of an FCM's insolvency, recovery may be limited to the Partnership's pro rata share of segregated customer funds available. It is possible that the recovery amount could be less than the total cash and other equity deposited.

Forward Contracts

Risks associated with forward currency and commodities contracts are the inability of counterparties to meet the terms of their contracts and movements in fair value and exchange rates.

Swap Contracts

The fair value of open swaps may differ from that which would be realized in the event the Partnership terminated its position in the contract. Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the aggregate fair value of swap contracts in an unrealized gain position as well as any collateral posted with the counterparty. The risk is mitigated by having a master netting arrangement between the Partnership and the counterparty and by the posting of collateral by the counterparty to the Partnership to cover the Partnership's exposure to the counterparty. Therefore, the Partnership considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in the fair value of the underlying investments.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 8 - PRINCIPAL RISKS (CONTINUED)

INVESTMENTS IN DERIVATIVES RISK (ALSO SEE NOTE 4) (CONTINUED)

Options

The Partnership is exposed to counterparty risk from the potential that a seller of an option contract does not sell or purchase the underlying asset as agreed under the terms of the option contract. The maximum risk of loss from counterparty risk to the Partnership is the fair value of the contracts and the premiums paid to purchase its open option contracts. The Partnership considers the credit risk of the intermediary counterparties to its option transactions in evaluating potential credit risk.

[INCLUDE ONLY IF PARTNERSHIP WRITES OPTIONS.]

Option Writing

Options written obligate the Partnership to buy or sell within a limited time, a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices. Options written by the Partnership may expose the Partnership to the market risk of an unfavorable change in the financial instrument underlying the written option.

Warrants

Since warrants have a limited life, as the expiration date of a warrant approaches, the time value of a warrant will decline. In addition, if the stock underlying the warrant declines in price, the intrinsic value of an “in the money” warrant will decline. Further, if the price of the stock underlying the warrant does not exceed the strike price of the warrant on the expiration date, the warrant will expire worthless. As a result, there is the potential for the Partnership to lose its entire investment in a warrant. The Partnership is exposed to counterparty risk from the potential failure of an issuer to settle its exercised warrants. The maximum risk of loss from counterparty risk to the Partnership is the fair value of the contracts and the purchase price of the warrants.

Credit-risk-related Contingent Features

The Partnership’s derivative contracts are subject to International Swaps and Derivatives Association (“ISDA”) Master Agreements which contain certain covenants and other provisions that may require the Partnership to post collateral on derivatives if the Partnership is in a net liability position with its counterparties exceeding certain amounts. **[OR: Certain of the Partnership's derivative contracts contain provisions whereby if its credit rating, as determined by major credit rating agencies indicated in the relevant contracts, were to fall below investment grade (or any other trigger/criterion as applicable or breach of credit covenants), the counterparty could demand additional collateral or require termination or replacement of derivative instruments in a net liability position.]** The aggregate fair value of all derivative instruments with credit-risk-contingent features that are

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 8 - PRINCIPAL RISKS (CONTINUED)

INVESTMENTS IN DERIVATIVES RISK (ALSO SEE NOTE 4) (CONTINUED)

Credit-risk-related Contingent Features (continued)

in a net liability position at December 31, 20XX, is \$[insert amount], for which the Partnership has posted \$[insert amount] as collateral in the normal course of business. If the credit-risk-related contingent features underlying these agreements were triggered as of December 31, 20XX, the Partnership would have been required to post additional collateral of \$[insert amount] to its counterparties. Additionally, counterparties may immediately terminate these agreements and the related derivative contracts if the Partnership fails to maintain sufficient asset coverage for its contracts or its net assets decline by stated percentages or amounts. As of December 31, 20XX, the termination values of these derivative contracts were approximately \$[insert amount] less than their fair values.

SECURITIES SOLD SHORT

The Partnership may sell a security it does not own in anticipation of a decline in the fair value of that security. When the Partnership sells a security short, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale. A gain, limited to the price at which the security sold short, or a loss, unlimited in size, will be recognized upon the termination of the short sale. Securities sold short represent obligations of the Partnership to deliver specified securities at contracted prices and thereby create a liability to repurchase the securities in the market at prevailing prices. Accordingly, these transactions involve, to varying degrees, elements of market risk, as the Partnership's ultimate obligation to satisfy the sale of securities sold short may exceed the amount recognized in the statement of financial condition. The Partnership is not exposed to this risk to the extent it holds offsetting long positions which are valued approximately \$[insert amount] at December 31, 20XX.

SECURITIES PURCHASED UNDER AGREEMENTS TO RESELL AND SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

[SEE ASU 860 TEMPLATE FOR ADDITIONAL DISCLOSURE]

Transactions involving purchases of securities under agreements to resell and securities sold under agreements to repurchase are treated as collateralized financial transactions, and are recorded at their contracted resell or repurchase amounts. In addition, interest on both types of transactions is included in interest receivable and interest payable, respectively. In connection with transactions in agreements to resell, it is the Partnership's policy that its custodian takes possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the agreements to resell, including accrued interest, at all times. At December 31, 20XX, securities with a fair value of approximately \$XX,XXX,XXX were received as

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 8 - PRINCIPAL RISKS (CONTINUED)

INVESTMENTS IN DERIVATIVES RISK (ALSO SEE NOTE 4) (CONTINUED)

SECURITIES PURCHASED UNDER AGREEMENTS TO RESELL AND SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE (continued)

collateral for securities purchased under agreements to resell. If the counterparty defaults under agreements to resell, and the fair value of the collateral declines, the realization of the collateral by the Partnership may be delayed or limited. At December 31, 20XX, securities with a fair value of approximately \$X,XXX,XXX, which are included in investments in securities in the statement of financial condition, were pledged to collateralize securities sold under agreements to repurchase.

[SEE ASU 860 TEMPLATE FOR ADDITIONAL DISCLOSURE]

SECURITIES LENDING AGREEMENTS

The Partnership has entered into securities lending agreements with its prime brokers. From time to time, the prime brokers lend securities on the Partnership's behalf. Those transactions are secured by cash collateral, the fair value of which, at all times, is required to be at least equal to the fair value of the securities loaned plus accrued interest and dividends. The Partnership earns a return by holding the cash at the broker or investing the cash typically in short-term, high-quality debt instruments. A rebate for a portion of the interest earned on the cash collateral is paid to the security lending agent for arranging the transaction. The Partnership has the right under its securities lending agreement to recover the securities loaned from the counter-party on demand. If the counter-party fails to deliver the securities on a timely basis, the Partnership could experience delays or loss on recovery. In addition, the Partnership is subject to risk of loss from investments made with cash collateral received, if any. In the event of default, the Partnership has the right to use the collateral to offset the net amount owed by the counter-party. At December 31, 2017, the Partnership loaned common stocks with a fair value of \$XXX,XXX and received \$XXX,XXX as cash collateral. **[Or, if applicable]** As of December 31, 20XX, there were no securities loaned.

LIBOR TRANSITION

The ICE Benchmark Administration ("IBA") ceased publication of one-week and two-month USD London Interbank Offered Rate ("LIBOR") settings after December 31, 2021, and intends to cease publishing the remaining USD LIBOR settings after June 30, 2023.

The Alternative Reference Rate Committee ("ARRC"), a group of diverse private-market participants assembled by the Federal Reserve Board and the Federal Reserve Bank of New York, was tasked with identifying alternative reference rates to replace LIBOR.

The Secured Overnight Finance Rate ("SOFR") has emerged as the ARRC's preferred alternative rate for LIBOR. SOFR is a broad measure of the cost of borrowing cash overnight

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 8 - PRINCIPAL RISKS (CONTINUED)

LIBOR TRANSITION (CONTINUED)

collateralized by Treasury securities in the repurchase agreement market. At this time, it is not possible to predict how markets will respond to SOFR or other alternative reference rates.

It is expected that a number of banks currently reporting information used to set LIBOR will stop doing so when their reporting commitments end. This will either end the publication of LIBOR immediately or degrade its quality such that it would no longer be a relevant metric to the Fund. Change in LIBOR could affect the interest rates of the Fund's LIBOR based investments and revolving credit facility.

[If applicable:] As of December 31, 20XX, the potential effect of no longer using the LIBOR rate component to the Fund's interest rates would not have had a material effect on either rate, thus the discontinuation of LIBOR is not expected to have a material effect on the Fund's financial statements.

[If applicable:] As of December 31, 20XX, The Fund holds LIBOR based investments with a fair value of approximately \$X,XXX,000. ***[Consider additional disclosures of the potential impact of a permanent cessation of LIBOR to the Fund's investments, financing arrangements and other contractual arrangements, and the Fund's plans to address the potential impacts.]***

RUSSIA-UKRAINE CONFLICT

The Russia-Ukraine war caused severe disruptions of the global supply chain, putting significant pressure on inflation. The recent commencement of war in Ukraine had an impact on international financial markets, leading to a significant rise in the price of oil and gas.

The unpredictable outcome of this conflict could inflict on the world economy significant and/or prolonged harm. Recent Russian military actions in Ukraine have prompted and might prompt further sanctions on Russia from the United States, the European Union, and other nations. Despite the fact that we have no direct exposure to Russia or the surrounding regions, the military incursion by Russia and the sanctions that follow could have a negative impact on the world's energy and financial markets, which could then have an impact on the businesses of our customers as well as our own. The extent and duration of the military action, sanctions and resulting market disruptions are impossible to predict, but could be substantial. Any such disruptions caused by Russian military action or resulting sanctions may magnify the impact of other risks described herein.

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 9 - GUARANTEES

In the normal course of its operations, the Partnership enters into contracts and agreements that contain indemnifications and warranties. The Partnership's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Partnership that have not yet occurred. However, the Partnership has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

[If applicable:] The Partnership is a guarantor of a loan payable entered into by a related party of approximately \$XXX,XXX, which matures on **[Date, Year]**. If the related party defaults on its loan payments, the Partnership may be required to perform under the guarantee to the extent of unpaid loan principal and interest amounts outstanding.

NOTE 10 - FINANCIAL HIGHLIGHTS

XYZ FUND, LP

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 20XX

NOTE 10 - FINANCIAL HIGHLIGHTS (CONTINUED)

Total return is computed using a time-weighted methodology whereby the returns for individual accounting periods are geometrically linked and proforma **incentive** allocations are taken into account. The ratios are computed using a weighted-average of the limited partners' capital for the year ended December 31, 20XX. Expenses of the Partnership paid indirectly are included for purposes of computing total return and are excluded for purposes of computing the ratios. The net investment **income/(loss)** ratio does not reflect the effects of the incentive allocation to the General Partner.**[FOR PERIODS GREATER THAN OR LESS THAN ONE YEAR:]** The ratios, excluding nonrecurring expenses and the incentive allocation to the General Partner have been annualized.**[If applicable, for investments in private investment companies]** The net investment income (loss) ratio does not reflect the income and expenses incurred by the underlying private investment companies.

NOTE 11 - SUBSEQUENT EVENTS

From January 1, 20XX through **[insert date]**, the Partnership accepted additional capital contributions of approximately \$**[insert amount]** (of which approximately \$**[insert amount]** is included in advance capital contributions as of December 31, 20XX) and had additional capital withdrawals of approximately \$**[insert amount]**.

In addition, as of **[insert date]**, the Partnership has received limited partner withdrawal requests that are anticipated to be effective on **[insert effective date or range of dates]**. The limited partner interests for these requests were approximately **XX%** of the partners' capital of the Partnership as of December 31, 20XX. The ultimate amounts withdrawn for these requests may vary based upon the performance of the Partnership and the amount of withdrawals declared effective by the Partnership and its limited partners.

[Additional disclosures are required for significant changes to the value of the Partnership. (i.e. Investment values or significant purchases or sales of investments, significant withdrawal request, liquidation of Partnership, reorganization, etc.)]
